PROFILE

People Analytics & Data AI Leader with 12+ years of experience across Nestlé, McKinsey, BCG, Micron, and academia. Built enterprise workforce analytics, predictive models, and cloud data platforms using Python, Snowflake, Azure, APIs, and BI tools to support global HR and business decision-making.

CORE SKILLS

People Analytics: Attrition Modeling, Workforce Planning, Payroll Analytics, Sentiment Analysis

Platforms: Snowflake, Azure (ADF, ADLS, Synapse, API Management), AWS

Technical: Python, SQL, Pandas, NumPy, TensorFlow, FastAPI

Visualization: Power BI, Streamlit, Tableau

EXPERIENCE

Professor of Practice – Computer Science

Aug 2024 – Present

UPES, Dehradun

- Delivered courses in Data Architecture, Snowflake, and Big Data through project-based learning.
- Mentored students on end-to-end analytics system design, including pipelines, APIs, and cloud deployment.

Innovation Lead – Data & AI (Global People Analytics)

Mar 2023 – Aug 2024

Nestlé HQ, Gurugram

- Delivered workforce intelligence solutions for the Global People Analytics team supporting enterprise HR decisions.
- Built analytics products for attrition, payroll insights, and workforce planning using Azure-based data platforms.
- Improved governance and data quality practices to strengthen reliability and scale of analytics delivery.

Data Scientist – Full Stack (People Analytics)

Aug 2021 – Apr 2023

Nestlé UK, York

- Developed end-to-end analytics solutions spanning ingestion, modeling, APIs, and dashboards.
- Built predictive models for attrition and workforce behavior to support proactive HR decision-making.
- Delivered dashboards for workforce planning and employee engagement insights.

Marie-Curie Early Stage Researcher

May 2019 – Aug 2021

University of York

- Developed Bayesian AI models for uncertainty-aware decision systems and predictive analytics.
- Published research in SafeAI 2021 and EAI 2021 on autonomous systems and clinical conversational AI.

Data Scientist – Data Platforms

Aug 2017 – Nov 2018

Micron, Japan

- Built Spark-based pipelines and predictive models to improve yield and operational decision-making.
- Integrated manufacturing and enterprise datasets to identify drivers of productivity and throughput.

Earlier Experience

2012 – 2016

Boston Consulting Group (BCG); McKinsey & Company

- Built analytics tools for workforce strategy, market assessment, productivity benchmarking, and functional efficiency.
- Supported HR and enterprise decision-making through data models on talent, cost, and operational performance.

SELECTED WORK

Global People Analytics Platform – Nestlé: Built workforce analytics solutions supporting enterprise HR decision-making.

Enterprise Analytics Platform – Nestlé HQ: Designed scalable Azure-based analytics architecture with CI/CD pipelines.

EDUCATION

M.Sc. Computer Science, University of Southampton

2009 – 2010

B.Tech. Electronics & Communication, Chitkara University

2005 – 2009

CERTIFICATIONS & PUBLICATIONS

Machine Learning & AI, upGrad

2019

Data Science for IoT, University of Oxford

2017
